

ORPHEUS

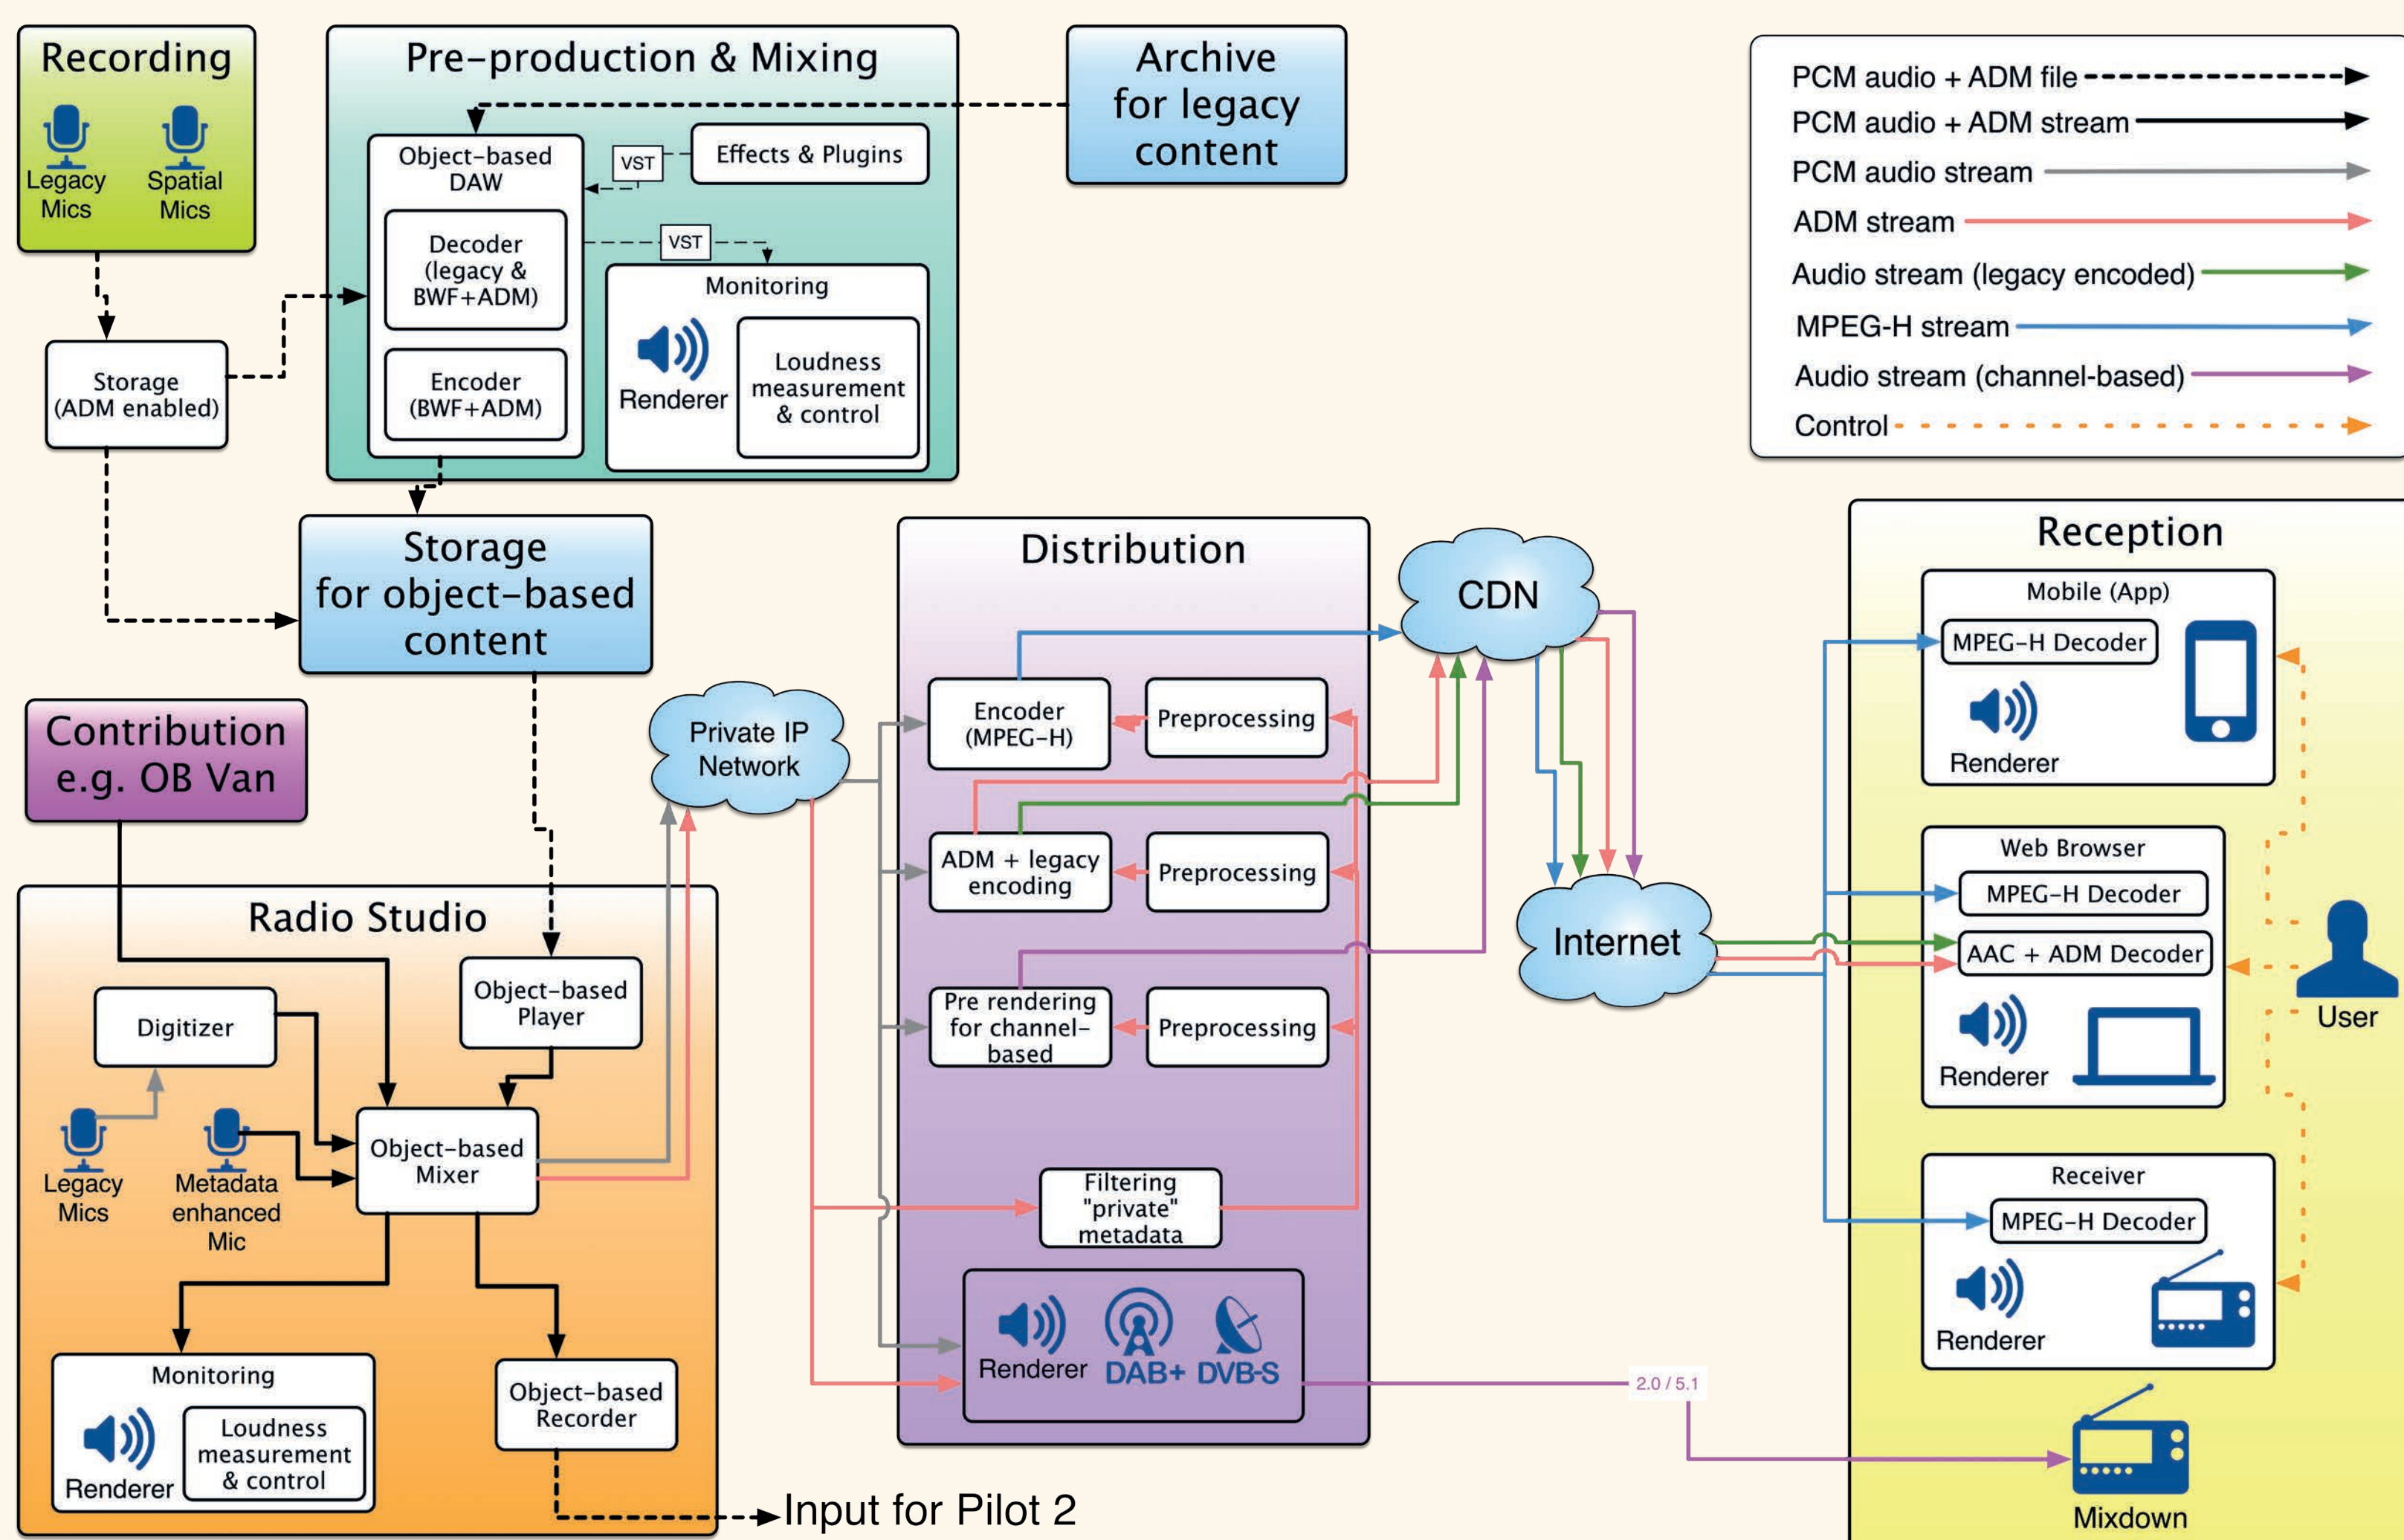

Object-Based Audio Experience

ORPHEUS is a European research project dedicated to improving the management of audio content.

It will develop, implement and validate a new end-to-end broadcast chain for object-based audio.

Key Features

- Accessibility of object-based audio content
- Interactive and personalised experiences
- Spatially immersive experiences

ORPHEUS architecture for object-based production and delivery of audio content (Source: IRT GmbH)

About the ORPHEUS project

Research and Innovation Action project under the EC's Horizon 2020 programme

30 months project duration, from 1st December 2015 to 31st May 2018

10 project partners from Germany, France, UK, and the Netherlands:

Fraunhofer IIS, Eurescom, BBC, IRT, Elephantcandy, Trinnov Audio, b<>com, IRCAM, Bayerischer Rundfunk, Magix

Acknowledgement

ORPHEUS has received funding under the European Union's Horizon 2020 programme, grant agreement number 687645. The European Commission has no responsibility for the content of this poster.
